PROJECTS

Blogging App | Nextjs, React, Tailwind CSS, Contentlayer, Vercel

[View Project](#)

- This is a markdown-supported personal blogging web application.
- It has configured the Giscus analytics provider with MDX support deployed on Vercel.
- The application includes personal blog information with all previous work similar to the portfolio.

Profile Builder | AWS Beanstalk, EJS, Node, Express, MongoDB Atlas

[View Project](#)

- Developed a dynamic Profile Builder web application using Node.js and Express, enabling users to create, edit, and manage personal profiles efficiently.
- Deployed the application on AWS Elastic Beanstalk, leveraging its scalable infrastructure to handle increased traffic and ensure high availability.

Dynamic Blog App | AWS Beanstalk, EJS, Node, Express, MongoDB Atlas

[View Project](#)

- Implemented user authentication and authorization with account creation, registration, and login functionalities.
- Utilized MongoDB Atlas for a cloud-based, scalable database solution.
- Designed and developed interactive and responsive UI using EJS.
